- 
- New ideas, such as those inspired by scientific developments, are often aired and critiqued in our popular culture as part of a healthy process of public debate, and scientists sometimes deserve the criticism they get.
 - Of particular importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency to notice, attend to, and remember more positive compared to negative information.
 - The really interesting and important aspects of science were increasingly those invisible to the naked eye, and the classification of things collected no longer promised to produce cutting-edge knowledge.
 - It is only when a political issue affects the welfare of those in a particular group that identity assumes importance.
 - So essential are social connections for our survival and well-being that we not only cooperate with others to build relationships, we also compete with others for friends.
- 

- 
- Consider, for instance, a teenager whose parents are suspicious and distrustful when she goes out at night; even if she has been forthright about her plans and is not breaking any agreed-upon rules, her identity as a respectable moral subject is undermined by a pervasive parental attitude that expects deceit and betrayal.
 - Since robots are particularly good at highly repetitive simple motions, the replaced human workers should be moved to positions where judgment and decisions beyond the abilities of robots are required.
 - One of the most common mistakes made by organizations when they first consider experimenting with social media is that they focus too much on social media tools and platforms and not enough on their business objectives
 - Because of the inner qualities with which the individual is endowed through heritage and environment, the mind functions as a filter; every outside impression that passes through it is filtered and interpreted
 - The time doctors use to keep records is time they could have spent seeing patients.
